

# Educational Program for Dental Medicine

2026-2027 Academic Year

Schedule for Fall (III) Semester

|           |             | gr. #1                                           | gr. #2                                 | gr.#3                                  |
|-----------|-------------|--------------------------------------------------|----------------------------------------|----------------------------------------|
| Monday    | 9.00-9.45   | Pathophysiology 1                                | Microbiology 1                         | Human Physiology 2                     |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 |                                                  |                                        |                                        |
|           | 11.45-12.30 |                                                  |                                        |                                        |
|           | 13.15-14.00 | Human Physiology 2 (lecture)                     |                                        |                                        |
|           | 14.10-14.55 |                                                  | From 14.30- Human Physiology 2         | General Pathological Anatomy           |
|           | 15.05-15.50 | Foreign Language - Georgian Language 3           |                                        |                                        |
|           | 16.00-16.45 |                                                  |                                        |                                        |
| Tuesday   | 9.00-9.45   | Microbiology 1                                   | Clinical Anatomy and Operative Surgery | Foreign Language - Georgian Language 3 |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 | Microbiology 1 (lecture)                         |                                        |                                        |
|           | 11.45-12.30 | Clinical Anatomy and Operative Surgery (lecture) |                                        |                                        |
|           | 13.15-14.00 |                                                  |                                        |                                        |
|           | 14.10-14.55 | Pathophysiology (lecture)                        |                                        |                                        |
|           | 15.05-15.50 | Clinical Skills                                  | Pathophysiology 1                      | Medical Biochemistry                   |
|           | 16.00-16.45 |                                                  |                                        |                                        |
| Wednesday | 9.00-9.45   | Clinical Anatomy and Operative Surgery           | Clinical Skills                        | Preclinical Operative Odontology       |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 | Medical Biochemistry                             | Prevention of Oral Diseases 1          |                                        |
|           | 11.45-12.30 |                                                  |                                        | Human Physiology 2                     |
|           | 13.15-14.00 |                                                  |                                        |                                        |
|           | 14.10-14.55 |                                                  |                                        |                                        |
|           | 15.05-15.50 |                                                  |                                        |                                        |
|           | 16.00-16.45 |                                                  |                                        |                                        |
| Thursday  | 9.00-9.45   | Medical Biochemistry                             | Foreign Language - Georgian Language 3 | Pathophysiology 1                      |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 |                                                  |                                        |                                        |
|           | 11.45-12.30 | Medical Biochemistry (lecture)                   |                                        |                                        |
|           | 13.15-14.00 | General Pathological Anatomy (lecture)           |                                        |                                        |
|           | 14.10-14.55 | General Pathological Anatomy                     | General Pathological Anatomy           |                                        |
|           | 15.05-15.50 |                                                  |                                        |                                        |
|           | 16.00-16.45 |                                                  |                                        |                                        |
| Friday    | 9.00-9.45   | Preclinical Operative Odontology                 |                                        | Clinical Anatomy and Operative Surgery |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 | Preclinical Operative Odontology                 | Microbiology 1                         |                                        |
|           | 11.45-12.30 |                                                  |                                        | Prevention of Oral Diseases 1          |
|           | 13.15-14.00 | Clinical Skills                                  |                                        |                                        |
|           | 14.10-14.55 |                                                  | Prevention of Oral Diseases 1          |                                        |
|           | 15.05-15.50 |                                                  |                                        |                                        |
| Saturday  | 9.00-9.45   |                                                  |                                        |                                        |
|           | 9.55-10.40  |                                                  |                                        |                                        |
|           | 10.50-11.35 |                                                  |                                        |                                        |
|           | 11.45-12.30 |                                                  |                                        |                                        |
|           | 13.15-14.00 |                                                  |                                        |                                        |
|           | 14.10-14.55 |                                                  |                                        |                                        |
