

**Dear Student,**

At last, we are nearing the end of an unusual and complicated online spring semester of the teaching year 2019/2020 with June 15-20 being the last week of the semester.

You are already familiar with knowledge assessment criteria (interim, final examination and final assessments), but I'd like to expand on the issue of **examination**. Examinations in **Physiology 1** as well as **Physiology 2** will be held in MCQ format under the aegis of the TSMU Examination Center. Typical tests for self-assessment and practice are displayed on the TSMU website. The process of examination and the rule of its regulation will be compatible with legal acts of TSMU which you may have already acquainted yourself with on our website.

We kindly ask you to keep a watchful eye on your interim assessments, which varies from 0 to 60, to rule out any accidental errors or ambiguity.

You do remember we promised you to hold **consultations** on our department June 22-27 following the end of teaching process by official academic calendar. But to hold them in a face-to-face format would be impossible as well as unjustifiable at the moment, as you might agree.

Therefore, we arranged a schedule of consultations (see appendix) where a teacher, teaching course (Physiology 1/2) and time of meeting are indicated. Clearly, attendance is not required, it's up to your wish and necessity; neither attendance nor knowledge will be checked. Understandably, links won't be sent to likely attendees. Rather, you will find a link for a consultation that you choose to attend (i.e. according to a teacher and a teaching course) on the website 15-20 minutes prior to the time of a consultation indicated in the schedule.

**Wish you health, success in examinations and, finally, good rest !**

Sincerely,

Irene Kvachadze, Professor,

Head, Department of Physiology

on behalf of academic personnel, Department of Physiology, TSMU

11/06/2020

Teacher	Teaching Course	Day, Time
Guram Sanadiradze, Marina Kutateladze	Physiology 1	June 23, Tuesday, 18 <sup>00</sup> -21 <sup>00</sup>
	Physiology 2	June 24, Wednesday, 18 <sup>00</sup> -21 <sup>00</sup>
Merab Tsagareli, Laura Tskhadadze	Physiology 1	June 23, Tuesday, 18 <sup>00</sup> -21 <sup>00</sup>
	Physiology 2	June 24, Wednesday, 18 <sup>00</sup> -21 <sup>00</sup>
Maka Chakhnashvili	Physiology 1	June 25, Thursday, 18 <sup>00</sup> -21 <sup>00</sup>
	Physiology 2	June 26, Friday 18 <sup>00</sup> -21 <sup>00</sup>
Tamar Chutkerashvili	Physiology 1	June 25, Thursday, 18 <sup>00</sup> -21 <sup>00</sup>
	Physiology 2	June 26, Friday 18 <sup>00</sup> -21 <sup>00</sup>
