Prof. Gian Luca Erre  
Associate Professor of Rheumatology  
Director Rheumatology Unit Azienda Ospedaliero-Universitaria of Sassari

Recommendation Letter  
Dott.ssa Lali Esebua  
Clinical and Research internship

To whom it may concern,

During her five-month internship at our department, Lali Esebua exhibited dedication to learning, a strong aptitude to perform clinical investigations and specific interest for clinical-based scientific research. Throughout the period of her internship, Lali actively engaged in inpatient and outpatient clinical activities, and despite not being directly involved in patient treatment, her keen observational skills allowed her to gain valuable insights into the management of diverse rheumatological conditions, including chronic articular inflammatory diseases, systemic vasculitides, systemic sclerosis, lupus, Sjogren's syndrome. Lali was specifically involved in the challenging diagnosis and management of two patients affected by macrophage activation syndrome in the context of SLE and elaboration of treatment strategy.

Moreover, Lali actively participated in capillaroscopy sessions and ultrasound procedures. Her willingness to engage in hands-on learning opportunities and her ability to effectively apply theoretical knowledge to practical scenarios were evident throughout her internship.

Beyond her clinical observations, Lali demonstrated a keen interest in scientific research by actively participating in the preparation of a case report. Her involvement in scholarly activities underscores her willingness to commit to advancing the field of rheumatology and enhancing patient care through evidence-based practices, also reflecting her dedication to academic excellence and professional growth.

In conclusion, Lali Esebua's internship experience has been highly beneficial both to her personal and professional growth. We hope that Lali will continue to excel in her career and and I look forward to witnessing her continued growth and success in the future.
