

To whom it may concern,

I am writing to offer my recommendation for Dr. Ketevan Paposhvili, a brilliant individual dedicated to the field of neurology and neurosciences. As the head of the Neurology Department at Azienda Ospedaliero Universitaria di Sassari, Cliniche San Pietro, I had the pleasure of working with Dr. Paposhvili during her stay with us.

Dr. Paposhvili began her journey with us demonstrating excellent clinical skills on neurological diseases and their management. Our neurology department deals with a wide range of neurological conditions, including extrapyramidal diseases, epilepsy, dementia, cerebrovascular diseases, headaches, multiple sclerosis, neurogenetic diseases, neuromuscular diseases, and other pathologies of the central and peripheral nervous system. Dr. Paposhvili embraced these challenges with dedication, demonstrating her ability to integrate modern diagnostic and treatment options, particularly relevant in our region known for immune-mediated disorders.

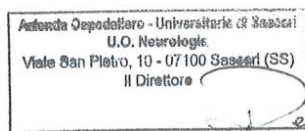

Throughout her time with us, Dr. Paposhvili exhibited exceptional dedication, hard work, and motivation towards neurology. She consistently demonstrated the essential qualities of an excellent physician, including empathy, collegiality, knowledge, education, critical thinking, and care. Moreover, her exemplary character and interpersonal skills further validate her suitability as a future medical professional.

In conclusion, I strongly recommend Dr. Ketevan Paposhvili for any future endeavors in neurology or related fields. She possesses all the necessary attributes to excel, including diligence, vigilance, motivation, empathy, and professionalism. I am confident that she will continue to make significant contributions to the medical community and positively impact the lives of her patients.

Sincerely,

Prof. Paolo Solla
