TSMU – U.S. MD Program

PROGRAM PRIORITIES

Graduates will be trained according to the requirements and standards of the Georgia medical / public health care system and Emory University School of Medicine (U.S.). Our goal is to produce:

- Superb clinicians who demonstrate the highest degree of professionalism, outstanding clinical competency and problem-solving skills, and the ability to understand and utilize basic science in the clinical setting
- Lifelong adult learners with the ability to take ownership of their own present and future educational needs.

- Physicians who continue to be passionate about medicine and about making a difference, who are involved in and appreciate efforts to improve the health of local and global communities, and who see medicine as a profession that seeks to address issues of social justice.

- Future leaders eager and able to play leadership roles in their chosen field of medicine or biomedical science, and in their community.

BENEFITS

- The program is created in a way, that students pass the two steps of the United States Medical Licensing Examination (USMLE) during the educational process.
 - Basic science and clinical education fully integrated.
 - Successful students apply for clinical clerkships at Emory University.
 - Graduate with the experience of completing their own research project.
